# "A" Desking

## **C&R** Interiors

At C&R, we value all clients' input. It is an utmost priority that you, our valued client, actively collaborate with us through open communication, honesty, trust, cooperation and teamwork as we journey together to fulfill your desired workspace vision. We want our clients to have a sense of ownership over this process of discovery – from taking what you have in mind of your desired workspace to the actualization of the product itself.

We want to develop a close working relationship with you as we get to understand your workspace needs and assist you to develop a customised working blueprint to fulfill your objective and desired outcome. As we work together to create your desired workspace, let's not forget to be kind to the environment and practice corporate social responsibility through our socially beneficial and economically viable management of resources. At C&R, we believe in creating and working in an office environment that benefits and cares for our next generation.

# "A" Desking

The straight "A" leg design provides a sturdy and very stable design. The wide stance keeps the frame upright whilst imparting a practical feel. This enables a clean and uncluttered layout, the way that it should be.

# "A" Desking

## **Cluster Made Creative**

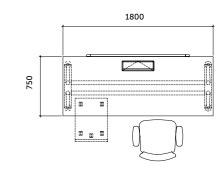

Unlike an atypical cluster desk arrangement that is narrow, "A" Desking creates exceptionally comfortable and spacious environment that also provides practical storage space to users. This cluster of 4 desks can also be personalized to suit a specific colour scheme according to your preference.

## Private Office - Executive

The refined appearance of "A" desking is evident in any private office setting through its rectangular and efficient work surfaces – displaying a simple but sleek design for any high level executive office.

CANTILEVER BRACKET

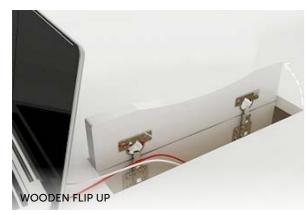

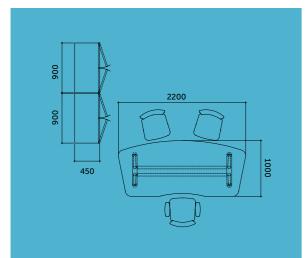

2D1F PEDESTAL

Designed to fulfill the emerging needs of an ever-changing work environment -from an individual workstation to fully equipped meeting desk, our "A" desking slide worktop design is the ultimate power solution through its design's easy power access along storage units.

## Wire Management

The "A" Desking also has a cable management system that gives you access to a hassle-free work surface. The functional yet versatile design of an integrated cable management module allows access to the power socket outlet beneath the table top via a hatch cover. The design also includes a turnable wire management tower cover that keeps wires hidden and allows ease of cable installation from the ground up to the table top.

With technology being an integral part of our office table configuration, we provide customizable solutions to users.

#### MELAMINE WOOD COLOURS

#### **MAINTENANCE GUIDE - FINISHES CARE AND MAINTENANCE**

To maintain the finish quality of our Essentia System, please follow the cleaning procedures provided below. With regular care and maintenance, the C&R furniture will provide years of superior performance and satisfaction.

The instruction for the care and maintenance are provided to you as a service. No warranty is implied since results vary.

#### **POWDERCOATED METAL**

For normal cleaning, wash coated metal surfaces with a soft cloth soaked in detergent and warm water; rinse thoroughly and dry. Remove scuff marks from low-gloss coatings with pre-softened paste wax, following the manufacturer's instructions.

For assistance in determining the appropriate colour and gloss for touch up paint, please contact C&R personnel.

#### **POLY-CARBONATE / ACRYLIC PANELS**

For normal cleaning, first rinse the surface with clean water to remove any particles of dust or other abrasive materials. Sponge the plastic gently with warm water and a mild, nonabrasive soap or a solution of ammonia and water. Rinse thoroughly with clean water and dry with a soft cloth. After cleaning, the polycarbonate can be polished with a good wax polish applied with a clean, soft flannel pad.

Do not use benzene, acetone, denatured alcohol, or gasoline. These solvents soften the surface of the plastic and may cause damage. Also avoid using glass cleaning compounds, abrasive cleaners, and hard instruments. Make sure cleaning materials are free of grit and other foreign materials.

#### **GLASS**

For normal cleaning, use products specifically designed for glass

#### **PLASTIC**

For normal cleaning, wash plastic surfaces with a soft cloth soaked in mild detergent and warm water. Rinse thoroughly and drop with a soft cloth. Do not use solvents or abrasive kitchen cleaners.

#### **MELAMINE / LAMINATES**

Products using melamine and laminate include tabletops, work surfaces, counter tops, overhead cabinets, filing cabinets. For normal cleaning, wash melamine and laminate with a soft cloth and a solution of mild detergent and warm water. Rinse thoroughly and dry with a soft cloth.

For minor report of burns or other stubborn marks, apply a nonabrasive liquid kitchen cleanser with a soft cloth soaked in warm water. Rub in the director of the grain; use caution to avoid damaging the surface texture or gloss. If no grain direction is visible, rub with a light, in circular motion.

Do not use powdered abrasives or other harsh cleansers like hypochlorite bleach, hydrogen peroxide, nitric or hydrochloric acids, or lye, they may deface the surface and change the finish colour.

#### **POLISHED ALUMINIUM**

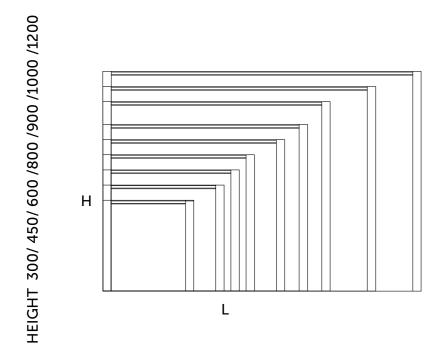

For normal cleaning, apply a pre-soften paste wax to polished aluminium components following the manufacturer's instructions. In humid atmospheres near salt water, apply the wax once a month. In other areas, apply wax evenly three months to maintain the appearance of the aluminium.

#### DISMANTLING INSTRUCTION FOR RECYCLING (WORKSTATIONS)

These instructions apply to all workstation products.

#### DISMANTLING

Components need to be broken down by material content and separated appropriately in order to maximize recycling. Setup a well-lit work area with benches and all necessary tools. Power tools are required for most jobs but some simple hand tools can handle the smaller jobs. Screw and nut with the appropriate bits are the most frequently used. Materials can be identified by using the chart below. Bins and boxes will be needed for each material.

#### **WORKSURFACES**

Laminate worksurfaces should have edge trim removed for recycling where possible. Locate the seam on the edging, pry out with straight screwdriver and peel off.

#### **ACCESSORIES**

Lighting and electrical accessories need further disassembly. Bulbs, ballasts and other electrical components must be separated for appropriate disposal. Wiring can be removed and recycled. Other accessories can be broken down and separated by material by removing visible fasteners.

#### PEDESTALS, LATERALS AND CABINETS

For steel cases, remove drawers by lifting up and out. Remove drawer fronts by removing attachment screws if fronts are different material. Remove any added handles. Remove slides (lift up and forward) and any small plastic parts from case interiors. Remove plastic casters from bottom of cases.

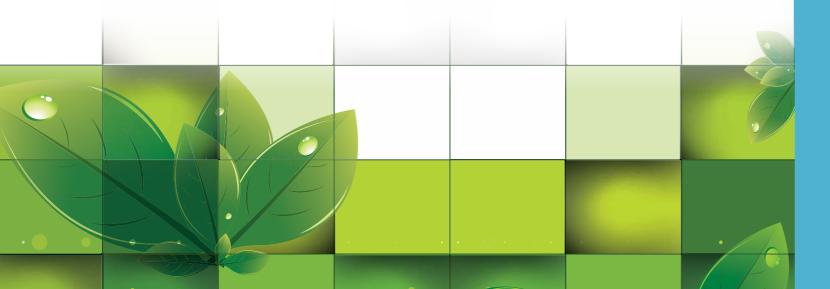

For wood cases, remove drawers by lifting up and out. Remove drawer fronts by removing attachment screws if fronts are different material. Remove any added handles. Unscrew slides and other metal brackets and parts from case, including locks and levelers. Hinged doors are removed by unfastening hinges and removing hardware.

#### **OVERHEAD STORAGE**

Removed doors by removing visible screws. Remove any added handles. Remove door mechanism and any brackets. With wood cabinets, dismantle any steel components. Steel cabinets do not usually need to be further broken down.

#### **SCREENS**

Once Mini screens are removed from furniture, screen material should be removed from its frame and hardware. Fabric screens should have the fabric removed by locating and edge and peeling off. Screens with glass in frames can be disassembled by removing screws and carefully sliding glass out. Once aluminium extrusions are identified, any cap at ends or corners should be removed by tapping sharply with hammer (press fit). Pray off and end caps, trim caps and separate materials. Accessory rails and whiteboard are handle in a similar manner.

# **C&R Ergonomics**

Our ergonomic direction is employed to fulfill the two goals of health and productivity. It is relevant in the design of such things as safe furniture and easy-to-use interfaces to machines and equipment. Proper ergonomic design is necessary to prevent repetitive strain injuries, which can develop over time and can lead to long-term disability

Ergonomics is commonly thought of as the way companies customize procedures, work areas and break rooms to maximize productivity while minimizing worker fatigue and discomfort. We know that keeping your personnel energized and comfortable is important for lowering stress and maintaining job satisfaction.

Designed with ergonomics in mind, our system furniture solutions will provide you with the highest levels of comfort, utility and durability. The height (750mm), depth (600-750mm), width, and angle of R50 Radius at table edges of the workstations all address that along with back and arm supports.

C&R Systems ergonomically designed office furnishings are certified for premium grade from the Singapore Environment Council and PSB for our storage cabinets, modular storage cabinets, mobile storage cabinets and system panels.

You can be certain that the office furniture you receive from C&R Systems is of the highest quality, and has been custom designed to function comfortably in some of the most rigorous ergonomic conditions.
