# C&R Interiors

At C&R, we value all clients' input. It is an utmost priority that you, our valued client, actively collaborate with us through open communication, honesty, trust, co-operation and teamwork as we journey together to fulfill your desired workspace vision. We want our clients to have a sense of ownership over this process of discovery – from taking what you have in mind of your desired workspace to the actualization of the product itself.

We want to develop a close working relationship with you as we get to understand your workspace needs and assist you to develop a customised working blueprint to fulfill your objective and desired outcome. As we work together to create your desired workspace, let's not forget to be kind to the environment and practice corporate social responsibility through our socially beneficial and economically viable management of resources. At C&R, we believe in creating and working in an office environment that benefits and cares for our next generation.

# Alpha

*"Design is a plan for arranging elements in such a way as best to accomplish a particular purpose."* Charles Eames

Alpha supports collaboration at all levels of an organization, from private offices to boardrooms. Available in various shapes, Preside tables can be specified in lengths from five to 20 feet or more. Select bases and accessories make it easy for people to connect with the latest technology., and details can be specified to match various Alpha desking lines

## General Desking

Cluster of 2,4,6,8 or 10 are designed to facilitate small office application, not only for space efficient, it is also more cost effective. Divider screen units can be linked to form an interconnected work environment.

# DISMANTLING INSTRUCTION FOR RECYCLING (WORKSTATIONS)

These instructions apply to all workstation products.

## DISMANTLING

Components need to be broken down by material content and separated appropriately in order to maximize recycling. Setup a well-lit work area with benches and all necessary tools. Power tools are required for most jobs but some simple hand tools can handle the smaller jobs. Screw and nut with the appropriate bits are the most frequently used. Materials can be identified by using the chart below. Bins and boxes will be needed for each material.

## WORKSURFACES

Laminate worksurfaces should have edge trim removed for recycling where possible. Locate the seam on the edging, pry out with straight screwdriver and peel off.

## ACCESSORIES

Lighting and electrical accessories need further disassembly. Bulbs, ballasts and other electrical components must be separated for appropriate disposal. Wiring can be removed and recycled. Other accessories can be broken down and separated by material by removing visible fasteners.

## PEDESTALS, LATERALS AND CABINETS

For steel cases, remove drawers by lifting up and out. Remove drawer fronts by removing attachment screws if fronts are different material. Remove any added handles. Remove slides (lift up and forward) and any small plastic parts from case interiors. Remove plastic casters from bottom of cases.

For wood cases, remove drawers by lifting up and out. Remove drawer fronts by removing attachment screws if fronts are different material. Remove any added handles. Unscrew slides and other metal brackets and parts from case, including locks and levelers. Hinged doors are removed by unfastening hinges and removing hardware.

## OVERHEAD STORAGE

Removed doors by removing visible screws. Remove any added handles. Remove door mechanism and any brackets. With wood cabinets, dismantle any steel components. Steel cabinets do not usually need to be further broken down.

## SCREENS

Once Mini screens are removed from furniture, screen material should be removed from its frame and hardware. Fabric screens should have the fabric removed by locating and edge and peeling off. Screens with glass in frames can be disassembled by removing screws and carefully sliding glass out. Once aluminium extrusions are identified, any cap at ends or corners should be removed by tapping sharply with hammer (press fit). Pray off and end caps, trim caps and separate materials. Accessory rails and whiteboard are handle in a similar manner.

# C&R Ergonomics

Our ergonomic direction is employed to fulfill the two goals of health and productivity. It is relevant in the design of such things as safe furniture and easy-to-use interfaces to machines and equipment. Proper ergonomic design is necessary to prevent repetitive strain injuries, which can develop over time and can lead to long-term disability.

Ergonomics is commonly thought of as the way companies customize procedures, work areas and break rooms to maximize productivity while minimizing worker fatigue and discomfort. We know that keeping your personnel energized and comfortable is important for lowering stress and maintaining job satisfaction.

Designed with ergonomics in mind, our system furniture solutions will provide you with the highest levels of comfort, utility and durability. The height (750mm), depth (600-750mm), width, and angle of R50 Radius on table edges of the workstations all address that along with back and arm supports.

C&R Systems ergonomically designed office furnishings are certified for premium grade from the Singapore Environment Council and PSB for our storage cabinets, modular storage cabinets, and mobile storage cabinets and system panels.

You can be certain that the office furniture you receive from C&R Systems is of the highest quality, and has been custom designed to function comfortably in some of the most rigorous ergonomic conditions.
